RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 70 pages. Original publisher: Washington, D. C. : U. S. Environmental Protection Agency, Prevention, Pesticides and Toxic Substances, 2008 OCLC Number: (OCoLC)229142412 Subject: Ethylene oxide. Excerpt: . . . cosmetic ingredients. They are not listed in the International Cosmetic Ingredient Dictionary, the primary source of cosmetic ingredient nomenclature. FDA also regulates finished cosmetic products after they are in commercial distribution and have entered interstate commerce. During the manufacturing of cosmetics, ETO is used as an ethoxylating agent for the synthesis of ethoxylated surfactants that are used in cosmetic products. FDA monitors cosmetic products for levels of 1, 4-dioxane, a reaction product of ETO formed during the ethoxylation process. There is a potential for residual ETO to be present in ethoxylated surfactants and cosmetic products containing these ingredients. In addition, there are many cosmetic ingredients that are derivatives of EG. Any unreacted EG present in a cosmetic ingredient, may also be present in a finished cosmetic product (Havery, 2008). ETOs pesticidal use to reduce microbial loads on cosmetics is minimal (less than 1 percent of total ETO pesticidal use). This RED addresses only the worker...
