From Galileo to Jonas Salk, they push and stretch society's boundaries through their great leaps of imagination and originality, providing us with everything from the wheel to rocket ships and penicillin. Today's masterminds in biotechnology promise lifespans up to 400 years, cures for cancer, and an end to pollution. He uses a unique method of tying in age-old stories and myths - from Prometheus and Eve to Faustus and Frankenstein - to ask the question: can we trust these scientists?.
